

Instructions for operating the Iron Mike Pitching Machine

1. The number one thing you must always be thinking about is Safety - Safety - Safety. The pitching arm is unforgiving.
2. Never open the cage door on the machine by the pitching arm while the power is on.

Operating the Iron Mike:

1. Put all the softballs in the hopper.
2. Move the screen around in front of the Iron Mike for protection for the machine.
3. On the back of the machine there is a gray box, that's the power switch.
4. Turn the power on.
5. On the back of the machine there is a blue box 4" x 8" x 12" that houses the on - off switches, they are push buttons.

6. Once you start the Iron Mike it is set to pitch 12 balls before a restart.
